

SCREWM NEEDLE

Adjust. Inject. Perfect.

Precision in every detail.
The new benchmark in premium needles
for professionals.

THE ONE CHOICE FOR PROFESSIONALS

“Now adjust depth with precision—right at your fingertips.”

Achieve Precision in Every Procedure

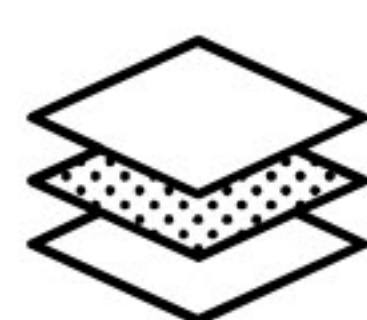

Unlike conventional needles with fixed lengths, the rotational hub structure enables real-time depth adjustment from 0–4 mm.

By tailoring the depth to match varying skin thickness across treatment areas, practitioners can perform procedures with greater precision and stability—enhancing delivery efficiency as well as overall injection comfort and patient satisfaction.

Whether for fillers, botulinum toxin, or various aesthetic injectables, this adjustable-depth needle provides the ideal solution for any aesthetic procedure requiring precise depth control.
